

ABOUT ME

Full-stack developer with a strong focus on backend (ASP.NET, EF, SQL) and hands-on experience in Angular. I enjoy tackling interesting challenges, finding creative solutions, and building scalable systems. Open-minded and friendly, I easily connect with people and work well in diverse teams.

<u>The Rolling Scopes School</u>	06.2022 - 03.2024
• <u>Front-end Basic (JavaScript)</u>	06.2022 - 09.2022
• <u>Front-end (JavaScript, TypeScript)</u>	09.2022 - 03.2023
• <u>React</u>	03.2023 - 06.2023
• <u>Angular</u>	10.2023 - 12.2023
• <u>Back-end (Node.JS)</u>	01.2024 - 04.2024
• <u>AWS cloud developer</u>	06.2024 - 08.2024

<u>Brest State Technical University</u>	1996-2001
• Mechanical Engineer	

WORK EXPERIENCE

Andersen - Software Developer	06.2023 - ...
• Developed backend services with .NET Core, EF Core, and PostgreSQL, implementing business logic, validation, and API endpoints for key features (retail management platform, permissions, content workflows), ensuring reliability and scalability. • Integrated email notifications and background services. • Contributed to the frontend with Angular, building UI components and supporting business workflows (~20% of time). • Collaborated closely with team members, participated in code reviews, and provided solutions for non-trivial technical challenges. • Ensured code quality by following clean architecture principles, best practices, and unit testing.	
Zyrafa Software - Software Developer	01.2023 - 06.2024
• Developed and implemented data input/output interfaces for CRM app, organized interaction with the API • Built adaptive frontend solutions for several e-commerce platforms, focusing on usability and client needs	
OJSC Belpromimpex Minsk Belarus	01.2011 - 09.2022
lead design engineer	
• Developed, launched and maintained the process of electronic document management, centralized storage of project documentation, using SolidWorks Enterprise PDM
